## **IMPORTANT SAFETY INFORMATION**

### **Fire prevention:**

It is permissible to place the unit on normally flammable surfaces.  
Suitable for mounting on normally flammable materials surfaces greater than 200°C with some combustion time lag.

### **Prevention from electric shock:**

High voltage is present inside the unit.  
Unplug the unit prior to performing any operation which involves touching the inside of the unit.  
Do not open the unit. The level of technology inherent in the unit requires the assistance of specialised personnel for all servicing. Please refer to an authorised D.T.S. service centre.  
This equipment must be grounded, do not connect to non-grounded supplies.  
The use of a thermal magnetic circuit breaker is recommended for each unit.  
Use only AC supplies 90-260V, 50-60Hz.  
The unit should never be located in position exposed to rain or in areas of extreme humidity.  
A good air ventilation is essential for proper equipment work.

### **Safety:**

The unit is not for residential use and must be installed by a qualified electrician or experienced person.  
In case lenses sets replacement is needed, frontal gasket must be replaced so as to maintain IP 65 rate protection. LEDs are not replaceable.  
The external surface of the unit may exceed 50°C; never handle the unit until at least 5 minutes have elapsed since the unit was turned off.  
Never install the unit in an enclosed area lacking sufficient air flow.  
The ambient temperature should not exceed 40°C and should not be lower than -10°C.

**INPUT/OUTPUT CONNECTIONS**

8-WHITE + / WHITE 4 +

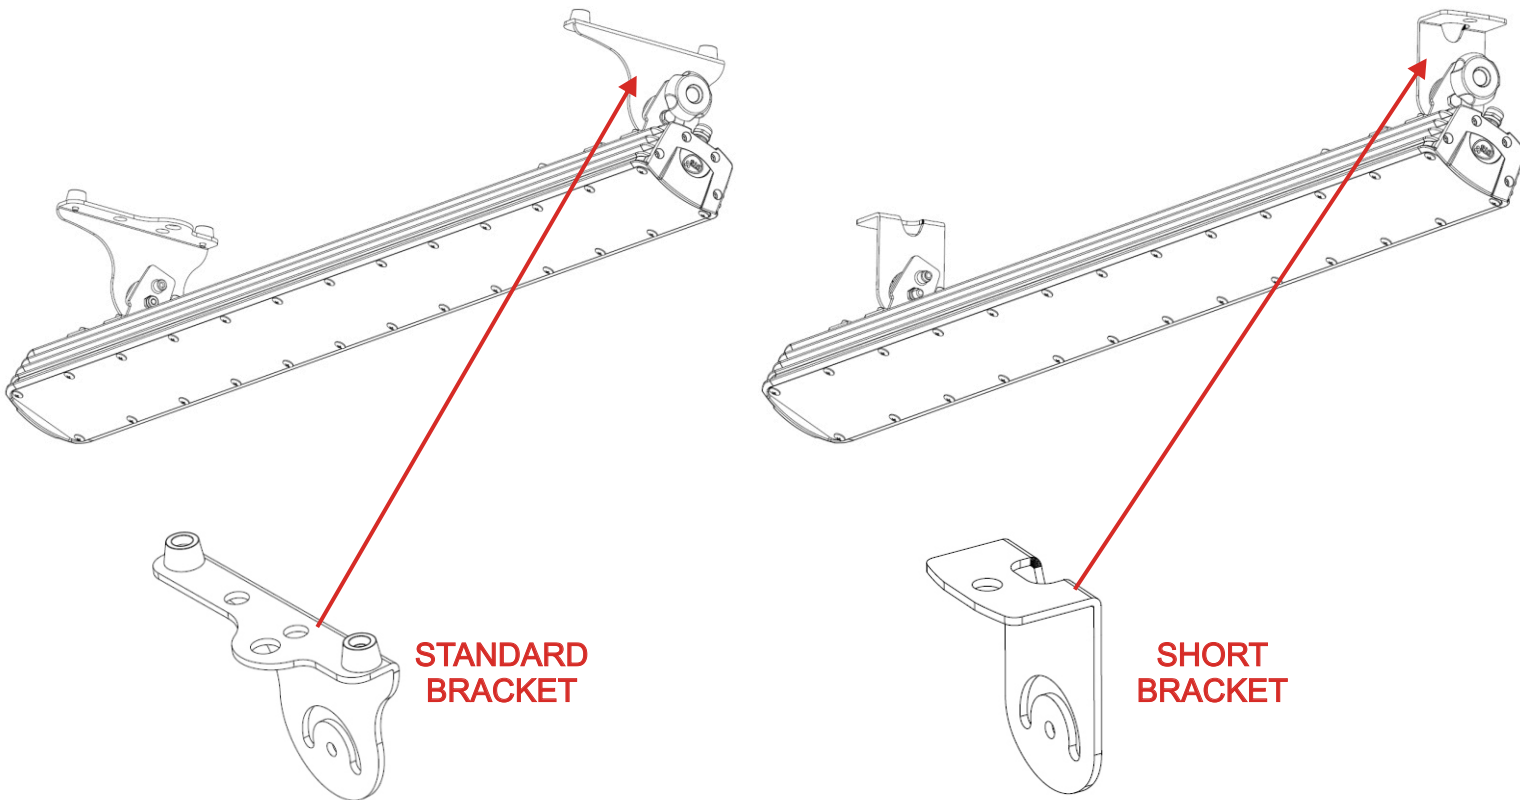

## INSTALLATION

The unit is suitable for use in wet locations.  
The unit may be either floor or ceiling mounted.

### FLOOR MOUNTING INSTALLATION:

### CEILING MOUNTING INSTALLATION:

## DMX SIGNAL CONNECTION:

FOS 100 SOLO IP 20 FC  
FOS 100 SOLO IP 20 CT

The unit operates using a digital DMX 512 signal. Connection between the controller and the unit or between units must be carried out using a two pair screened  $\varnothing$  0.5 mm. Ensure that the conductors do not touch each other. Do not connect the cable ground to the DMX connector chassis. The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first unit to the DMX IN plug of the second one. In this way, all the projectors are cascade connected.

P.S:

If the display showing the DMX address flashes, then one of the following errors has occurred:

- DMX signal not present
- DMX reception problem

For Installations where long distance DMX cable connections are needed, we suggest to use a DMX terminator.

The DMX terminator is a male XLR 3-5 pins connector with a 120 ohm resistor Between pin 2 and 3. The DMX terminator must be plugged into the last unit (DMX out panel connector) of the DMX line.

PLACE A 120 OHM RESISTOR BETWEEN PIN 2 AND 3 OF A MALE XRL CONNECTOR AND PLUG IT INTO THE DMX OUT PANEL CONNECTOR OF THE LAST UNIT CONNECTED TO THE DMX LINE

The standard configuration of the FOS 100 SOLO is with XLR 5 pins connectors.

**DMX SIGNAL CONNECTION:**

FOS 100 SOLO IP 65 FC  
FOS 100 SOLO IP 65 CT

The unit operates using a digital DMX 512 signal. Connection between the controller and the unit or between units must be carried out using a two pair screened  $\varnothing$  0.5 mm. Ensure that the conductors do not touch each other. Do not connect the cable ground to the DMX connector chassis. The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first unit to the DMX IN plug of the second one.

In this way, all the projectors are cascade connected.

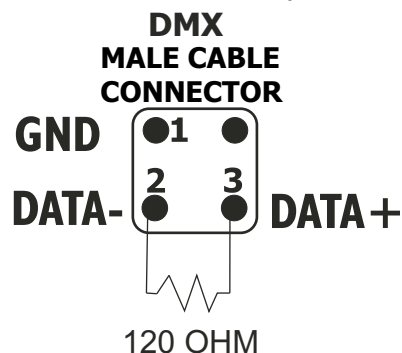

P.S:

If the display showing the DMX address flashes, then one of the following errors has occurred:

- DMX signal not present
- DMX reception problem

For Installations where long distance DMX cable connections are needed, we suggest to use a DMX terminator.

The DMX terminator is a male DMX cable connector with a 120 ohm resistor Between pin 2 and 3. The DMX terminator must be plugged into the DMX out panel connector of the last unit connected to the DMX line.

PLACE A 120 OHM RESISTOR BETWEEN PIN 2 AND 3 OF A MALE DMX CONNECTOR AND PLUG IT INTO THE DMX OUT PANEL CONNECTOR OF THE LAST UNIT CONNECTED TO THE DMX LINE

## DMX ADDRESS

FOS 100 SOLO FC and FOS 100 SOLO CT can be used in seven different modes: 10 DMX channels mode (default), 6 DMX channels mode (Shutter + Dimmer + RGBW), WALL mode (6 DMX channels; for use with DTS Wall mounted DMX controller 0514L007), M4CH mode (5 DMX channels; Dimmer + RGBW), RGBW mode (4 channels), 1 DMX channel mode or CUSTOM DMX mode (not yet implemented).

If you want to use the FOS 100 SOLO FC or CT in "WALL" mode, select the "WALL" mode from the MODE menu and set the following addresses on the mixer: **(To be used only with DTS Wall mounted DMX controller 0514L007)**

Projector 1 A001  
 Projector 2 A006  
 Projector 3 A012  
 ..... A....  
 projector 6 A030

If you want to select the next projector, just add "6"

**DTS Wall mounted DMX controller 0514L007 assign 6 DMX channels per unit also if some channels are not used**

If you want to use the FOS 100 SOLO FC or CT in 10 channels mode, select the 10 CH mode from the MODE menu and set the following addresses on the mixer:

Projector 1 A001  
 Projector 2 A011  
 Projector 3 A021  
 ..... A....  
 projector 6 A051

If you want to select the next projector, just add "10"

### Selecting the DMX address

1) Press the UP-DOWN key until you reach the required DMX address. The numbers on the display will start to flash (but the new DMX address hasn't yet been set).

2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now controlled by the new DMX address.

TIPS: if you keep pushed the UP or DOWN keys, the channels are calculated more quickly and you get a faster selection.

**DISPLAY FUNCTIONS**

**FOS 100 SOLO FC  
FOS 100 SOLO CT**

**DISPLAY FUNCTIONS**

The FOS 100 SOLO display panel shows all the available functions . Using these functions, it is possible to change some of the parameters and add some functions. Changing the D.T.S. setting can vary the functions of the unit so that it does not respond to the DMX 512 signal used to control it. Carefully follow the instructions below before carrying out any variations or selections.  
NOTE: the symbol shows which key has to be pushed to obtain the desired function.

**Software version 5.16**

<p><b>ADD 1</b> </p> <p><b>REVERSE DISPLAY</b> Reverses display's reading depending on the mounting position (On the ground or suspended).</p> <p><b>DISPLAY STAND BY</b> To turn off the display (after 5 seconds) or leave it always on.</p>	<p><b>dISP</b> </p> <p><b>POS 1</b> </p> <p><b>Stby</b> </p>	<p><b>AA</b> Floor position </p> <p><b>UU</b> Suspension position </p> <p><b>off</b> Display OFF </p> <p><b>on</b> Display always ON </p>
<p><b>node</b> </p> <p><b>DMX MODE</b> To select DMX mode : 10 DMX channels mode (default), 6 DMX channels mode (Shutter + Dimmer + RGBW), 15 DMX channels mode, WALL mode (6 DMX channels; for use with DTS Wall mounted DMX controller 0514L007), M4CH mode (5 DMX channels; Dimmer + RGBW), RGBW mode (4 channels), 1 DMX channel mode.</p> <p><b>AUX mode</b> let you activate an external ON-OFF control on IR connector. (not implemented on FOS 100 SOLO)</p> <p><b>CUSTOM DMX mode</b> let you set the parameters for Shutter, Dimmer, Red, Green, Blue, White, White pre-programmed, CTC, Macro and Function to the desired DMX channels.</p>	<p><b>10CH</b> </p> <p><b>6CH</b> </p> <p><b>15CH</b> </p> <p><b>WALL</b> </p> <p><b>M4CH</b> </p> <p><b>RGBW</b> </p> <p><b>1CH</b> </p> <p><b>CUST</b> </p>	<p>Default DMX Mode = 10 CH </p> <p></p> <p></p> <p></p> <p>Shutter + Dimmer + RGBW </p> <p>Dimmer + RGBW </p> <p>Custom mode enabled </p> <p>Show Custom settings </p> <p>Parameters Setting on Custom Mode </p>

**MACRO**  
 MACRO Function, enable channel mapping macro rainbow effects  
 STD (default)

**AUX MODE**  
 External ON - OFF control on IR connector (not implemented on FOS 100 SOLO)

**STD**  
 Standard mode enabled: (Default).  
**EXT**  
 Extended mode enabled: Rainbow effects on MACRO channel.

**LED**  
 RGBW Min/Max, Smooth, Compression, Sync and Boost level values settings

**Min** Default = 0  
**Max** Default = 255

**RGBA MINIMUM VALUES**  
 This menu allow to select the minimum levels for Red, Green, Blue and White

**Min** Default = 0  
**Max** Default = 255

**RGBA MAXIMUM VALUES**  
 This menu allow to select the maximum levels for Red, Green, Blue and White

**Min** Default = 0  
**Max** Default = 255

These settings have priority on Master Dimmer channel

**SMOOTH VALUE**  
 This menu allow to select the value of the delay (in milliseconds) for RGBW and Dimmer channels reaction to DMX or Program variation.  
 Off=25 ms delay (Fast response)  
 20=250 ms delay (Slow response)

**Min** Default = 0  
**Max** Default = 255

**COMPRESSION**  
 This menu allow to select between Linear current output or Quadratic current output for LEDs  
 Default = Linear

**4** Range = Off-20  
 Default = 4

Off = 25 ms  
 Instant response to DMX variation

20 = 250 ms  
 Smooth response to DMX variation

**SYNC**  
 This menu allow to adjust the PWM frequency value (Hz) in order to reduce flickering in the process of your camera recordings

**Line** Linear = Linear current output

**BOOST DRIVING**  
 This menu allow to increase the LED's current from 350 mA to 500 mA

**Quadr** Quadratic = Linear light output

**610** Range = 610 Hz -10 KHz  
 Default = 610 Hz

**On** Boost mode activated

**OFF** Boost mode deactivated

With BOOST active, the LED's current is set to 500 mA (30% more gain).  
 Default = Disabled

**AUTOMATIC MODE**

Automatic demo game without DMX controller

**ChPr**

Chase with 16 steps previously created in REC MODE  
Speed and Wait time selectable by user

**CUPr**

RGB values selectable by user

**Rainbow (rAI n)**

Rainbow colours effect.  
Speed time selectable by user

**CU01-CU16**

Color Macros as on DMX channel 8 (Macro)

**WHITE MACROS**

16 macros for White color from 2700K to 8000K (FOS 100 FC) or 2700K to 6500K (FOS 100 CT)

**DIMMER**

Dimmer level selectable by user as on DMX channel 2 (Dimmer)  
Dimmer level is active for all the programs and macros

**SHUTTER**

Shutter level selectable by user as on DMX channel 1 (Shutter)  
Shutter level is active only for CU01/CU16 and Wh01/Wh16 macros

**ESC**

Esc from Automatic Mode Menu

**REC MODE**

In DMX Recorder Mode, it is possible to create and store the scenes of the ChPr by using an external DMX controller.  
The unit must be set to 10 channels MODE

**DMX Recorder Mode**

For the programming of ChPr by using a DMX controller, besides the 10 channels necessary to control the unit a further 3 DMX channels are needed.

So that in RECORDER mode (via DMX) the unit will need 13 channels to be correctly programmed.

The three new DMX channels are:

DMX channel 11 = SCENES channel

From 0-10 = no function (r001)

From 11-255 are displayed the programmable scenes (max 16 scenes from M001 to M0016 )

DMX channel 12 = EDIT channel:

-From 0-19 = no function

-From 20-234 the unit runs the configuration given by the received input DMX values.

With the channel SCENES it is possible to pass from one step to the next while with REC it is possible to record the selected scene.

-From 235-255 the unit runs the configuration given by the received input DMX values closing the sequence as last scene.

With the channel REC it is possible to record the selected scene as last scene.

DMX channel 13 = RECORDING channel

Records the set scene with a variation between 0 to 255 (the display flashes indicating that the scene has been recorded).It is advised that you keep the REC channel set to 0 and to run through the 255 only once you have decided to save the scene. If ChPr is not closed, by indicating the last scene ( Edit channel between 235-255), in playback mode all 16 scenes will be played through even if not programmed

**SLAVE MODE**  
Slave mode for ChPr program.  
All slave units will be synchronised with master unit, running their own Chpr program.

**INFRARED MODE**  
Infrared remote control.  
By activating Ir MODE, it will be possible to navigate through the unit functions by using the D.T.S. infrared remote control.  
D.T.S. Code :0514L008

NOTE:  
External infrared remote sensor needed.  
D.T.S. Code :03.LA.016

NOT IMPLEMENTED ON FOS 100

**WIRELESS DMX**  
Wireless DMX enabled/disabled.

WIRELESS DMX Disabled (Default)

WIRELESS DMX Enabled

Wireless DMX receiver kit on FOS 100 is available on request.

UNLINK = LOG OUT

**FAN SPEED CONTROL**  
Internal Fan Speed control selectable by user.  
Range: OFF - 24 volt  
Default : 12 volt

Fan Speed Control  
Range: OFF - 24 volt  
Default = 12 volt

**EMERGENCY**  
Emergency operating mode.  
By setting Emergency mode, it will be possible to select one of the 16 preprogrammed WHITE cues that will then ran if DMX signal is missing or not available.  
Usefull for Emergency EXIT illumination on public areas.

Default = OFF

Default = White 1

Default = 255

## **AUTOMATIC OPERATION (AUTO):**

FOS 100 SOLO can work in automatic mode without a DMX controller. First of all connect the projectors with a DMX cable (picture below). A maximum quantity of 32 slave units can be connected to the same Master unit.

To activate Auto mode on the first unit, use the menu to run through the different modes until AUTO appears on the display, and press enter.

Now it is possible to choose between the different pre-programmed games (CUPr-RAIn-CU01/CU16-Wh01/Wh16) or ChPr which is user programmable through REC mode. To confirm game activation press ENTER on the selected GAME.

### **CUPr-RAIn-CU01/CU16-Wh01/Wh16**

The first unit that will work as a Master should be placed in Automatic mode (AUTO), the other units have to be placed in 10 DMX channels mode (MODE 10CH) and the DMX address should be set at A001. For RaIn (rainbow) game it is possible to select the speed for the colour changing (SPEE). DIMMER function (in AUTOMATIC MODE) is active for all the programs. SHUTTER function (in AUTOMATIC MODE) is active only for CU01/CU16 and Wh01/Wh16 macros.

### **ChPr MASTER/SLAVE**

The first unit that will function as a Master must be set to Automatic mode (AUTO), the other units must be set to Slave mode (SLAV), selectable through the menu. In this way all the Slave units will be synchronised with the master and running their own ChPr game.

On the master unit it is possible to vary the Speed time (SPEE) for the colour changing and the Wait time (UAIIt) between the steps.

Speed time and Wait time on the Master, have priority on the slave units.

NB: It is possible to run GA.Pr on the other units even though these do not have GA.Pr programmed. You can do this by setting the units to 10 DMX channels mode and selecting DMX address A001.

## **Rec mode**

It is possible to program your own game on the FOS 100 SOLO FULL RGBW / FOS 100 SOLO FULL WHITE CT that will then run it in AUTO mode (ChPr).

Each unit can have its own programmed game.

In REC mode the unit must be set to 10 DMX channels mode.

To program the ChPr by using a DMX controller, you need 3 more channels in addition to the 10 channels necessary to control the unit.

So that in RECORDER mode (via DMX) the unit will need 12/13 DMX channels to be correctly programmed.

The three new DMX channels are:

DMX channel 11 = SCENES channel

From 0-10 = no function (r001)

From 11-255 are displayed the programmable scenes (max 16 scenes from M001 to M0016)

DMX channel 12 = EDIT channel:

-From 0-19 = no function

-From 20-234 the unit runs the configuration given by the received input DMX values.

With the channel SCENES it is possible to pass from one step to the next while with REC it is possible to record the selected scene.

-From 235-255 the unit runs the configuration given by the received input DMX values closing the sequence as last scene.

With the channel REC it is possible to record the selected scene as last scene.

DMX channel 13 = RECORDING channel

Records the set scene with a variation between 0 to 255 (the display flashes indicating that the scene has been recorded). It is advised that you keep the REC channel set to 0 and to run through the 255 only once you have decided to save the scene. If ChPr is not closed, by indicating the last scene (Edit channel between 235-255), in playback mode all 16 scenes will be played through even if not programmed.

## FOS 100 SOLO CT

**RGBW mode (4 DMX channels)**

- 1 RED = WHITE 1**
- 2 GREEN = WHITE 2**
- 3 BLUE = WHITE 3**
- 4 WHITE = WHITE 4**

DMX CHANNEL	<b>1</b>	Parameter: <b>RED = WHITE 1</b>
-------------	----------	---------------------------------

DMX range Value	Mid point DMX value	Move range (degrees)	Mode	Option	Function
<b>0-255</b>					<b>Proportional colour</b>

DMX CHANNEL	<b>2</b>	Parameter: <b>GREEN = WHITE 2</b>
-------------	----------	-----------------------------------

DMX range Value	Mid point DMX value	Move range (degrees)	Mode	Option	Function
<b>0-255</b>					<b>Proportional colour</b>

DMX CHANNEL	<b>3</b>	Parameter: <b>BLUE = WHITE 3</b>
-------------	----------	----------------------------------

DMX range Value	Mid point DMX value	Move range (degrees)	Mode	Option	Function
<b>0-255</b>					<b>Proportional colour</b>

DMX CHANNEL	<b>4</b>	Parameter: <b>WHITE = WHITE 4</b>
-------------	----------	-----------------------------------

DMX range Value	Mid point DMX value	Move range (degrees)	Mode	Option	Function
<b>0-255</b>					<b>Proportional colour</b>

**1 CHANNEL MODE****1 DIMMER**

DMX CHANNEL	<b>1</b>	Parameter: <b>DIMMER</b>
-------------	----------	--------------------------

DMX range Value	Mid point DMX value	Move range (degrees)	Mode	Option	Function
<b>0-255</b>					<b>Proportional dimmer</b>

**WIRING CONNECTIONS**

FOS 100 FC

**LED INPUT**

M12 Male cable connector

- Pin 1 = RED +
- Pin 2 = RED -
- Pin 3 = GREEN +
- Pin 4 = GREEN -
- Pin 5 = BLUE +
- Pin 6 = BLUE -
- Pin 7 = WHITE +
- Pin 8 = WHITE -

**Z1 PLUS IP 20 LED Controller  
(D.T.S. Code 03.LA.009P)**

RJ45 MALE TO M12 FEMALE  
CABLE CONVERTER  
(D.T.S. Code: 03.LA.061)

**LEDS  
CONNECTOR PINOUT**

- Pin 1 = RED +
- Pin 2 = RED -
- Pin 3 = GREEN +
- Pin 4 = GREEN -
- Pin 5 = BLUE +
- Pin 6 = BLUE -
- Pin 7 = WHITE +
- Pin 8 = WHITE -

8-pin Female (RJ45)

**IMPORTANT:**

The maximum number of FOS 100 FC or CT connectable to the Z1 PLUS IP20 LED Controller is 1 pcs.

**NEVER CONNECT OR DISCONNECT A FOS 100 UNIT WHEN THE POWER SUPPLY IS TURNED ON.**

The maximum distance between Z1 PLUS power supply and the unit should not exceed 100 meters.

**WIRING CONNECTIONS**

**IMPORTANT:**

The maximum number of FOS 100 FC or CT connectable to each Z8 LEDs output is 1 pcs.

**NEVER CONNECT OR DISCONNECT A FOS UNIT WHEN THE POWER SUPPLY IS TURNED ON.**

The maximum distance between the Z8 and the FOS 100 FC or CT should not exceed 50 meters.
